

Small solid waste roll off containers and trucks

What is a 20 yard roll-off container?

GFL's 20 yard roll-off containers are great for construction and small demolition projects, as well as general removal of waste and other materials.

What is a rectangular roll-off container?

Rectangular open top roll-off dumpsters: Wastequip's rectangular open top roll-off containers are their most durable, heavy-duty containers. They are designed for the most demanding waste hauling and scrap collection jobs. Wastequip roll-off containers meet ANSI safety specifications and dimensional standards for haulers.

What is a 10 yard roll-off container?

A 10 yard roll-off container is a type of container designed for those who need something slightly larger than a regular dumpster. GFL's 10 yard roll-off containers are ideal for small renovation projects.

What are the different types of roll-off containers?

The two basic types are: Rectangular--Most popular in the northeastern U.S.; the rectangular roll-off container is the one ordered most. These resemble containers you might have seen on cargo ships and are made of reinforced steel to accommodate the densest and most rugged waste materials.

What is a 10 yard roll-off?

A 10 yard roll-off is a container designed for small renovation projects. It can handle around 3 to 4 pickup truck loads or roughly 4,000 to 6,000 lbs. These containers primarily collect municipal solid waste, construction waste, and renovation debris on job sites. However, other items can be permitted depending on your business needs.

How many tons can a roll-off container hold?

Holds 3.5 to 5 tons. 40 yards--Contractors and property owners often call for the king of roll-off containers. Do not start a building demolition without one. High walls allow you to stack waste material for removal. It is the top choice for the biggest jobs in renovation and restoration. Holds 5 to 6 tons. How Long Will I Need a Roll-Off Container?
