

What is a Solar catamaran?

The solar catamaran was commissioned by an experienced family of yacht owners deeply engaged in sustainability and looking for the perfect eco-responsible motor yacht. The four-cabin catamaran boasts a custom-tailored layout and is designed to accommodate eight guests in full luxury.

Who makes Sol Cat catamarans?

Sol Cat catamarans were made from 1973-1979 by the US company Sol Catamarans Inc, designed by Gene Vernon. This one is for sale because we bought a bigger catamaran and have not sailed it recently. The fiberglass is in great shape, with no weakness or denting.

Does Sunreef Yachts have solar power?

Apart from being equipped with two 360kW engines and a set of 990kWh batteries, this electric catamaran boasts Sunreef Yachts' revolutionary solar power system with panels fully integrated with the composite structures.

How many guests can a 4 cabin catamaran accommodate?

The four-cabin catamaran boasts a custom-tailored layout and is designed to accommodate eight guests in full luxury. With an energy-saving air conditioning system and smart energy management, this electric yacht sets new standards for eco-cruising.

How light is a catamaran?

It's light. Without giant diesels rumbling away in its belly, the catamaran is fairly lightweight with a relatively scant displacement of 198 tonnes. You feel that lightness in other places. For example, the bounciness of a faux-teak grate on the swim platform caught me by surprise.

Where was the first catamaran built?

Hanging in the Herreshoff Marine Museum in Bristol, Rhode Island, is one of the first catamarans ever built in the Western world. Brothers John and Nathanael Herreshoff drew inspiration from the seaworthy Polynesian ama that dates to antiquity to design the little cat as the hotrod of its day.
