

What is the solar electric power Association (SEPA)?

The Solar Electric Power Association (SEPA) is an educational non-profit association that helps utilities integrate solar energy into their portfolios.

Who is the Smart electric power alliance (SEPA)?

Our board is comprised of industry luminaries from across the electric power sector including utilities and solution providers. The Smart Electric Power Alliance (SEPA) is an educational non-profit and a trusted platform for the research and collaboration for smart energy resources.

How does SEPA help community solar programs?

By producing a range of more standardized, streamlined and cost-effective business models that can be easily localized across the country, SEPA will spark the growth of community solar programs. For more information on this award and the Solar Market Pathways program, visit their website .

Who is involved in community solar research?

Research on community solar models will be driven by a working group made up of diverse stakeholders including utilities, solar industry representatives, state governments, non-governmental organizations, and consumer advocacy organizations.
