

Does Georgia Power offer incentives for solar?

Georgia Power does not offer incentives specifically for solar installations. However, they do offer rebates and incentives for energy efficient appliances such as clothes washers, water heaters, lighting fixtures, and programmable thermostats. A list of these items can be found [here](#).

How does Georgia Power's Solar Program work?

Georgia Power's Solar Program helps maximize savings by encouraging the use of solar electricity at home. This reduces the amount of electricity sent back to the grid.

How many kW is a solar system in Georgia?

Georgia Power sets the following size limits for residential and commercial solar systems: residential systems are limited to 10 kW and commercial systems to 250 kW. Georgia Power is part of the Southern Company, which is the state's largest utility.

Does Georgia Power pay for excess solar power?

Georgia Power does not pay customers the full retail rate for excess solar power sent back to the grid. Instead, they compensate customers at the avoided energy rate, which is equivalent to the amount that the utility would otherwise pay to buy the power on the open market.

Can I Sell my solar energy back to Georgia Power?

Customers connected to the grid with home solar systems in Georgia can sell their excess electricity back to Georgia Power for bill credits. Any excess solar energy generated in a month will carry over to the next month.

Where are solar panels made in Georgia?

The Dalton plant in Georgia, which began shipping solar panels in February 2019, employs 600 American workers who operate the high-tech assembly lines imported by Hanwha from Korea. Georgia's then-Gov. Nathan Deal announced the plant in May 2018, four months after President Trump imposed a 30% tariff on solar panel imports.
