

What is a solar power bank?

A solar power bank is essentially a portable battery with a built-in solar panel, often around 5W or less. It's designed to store energy, letting you charge your devices anytime. Imagine you're at a music festival, capturing moments on your phone.

How do solar power banks work?

Solar power banks charge electronic devices using energy from the sun. The energy is stored in a fitted rechargeable battery. Solar power banks should be charged first using the sun before being used. Apart from solar energy, the power banks can also be charged using a normal electric outlet.

What can you charge with a solar power bank?

Having a solar power bank means being able to charge all your electronics anywhere, any time. Say good-bye to dead mobile phones during travel or extended periods away from an outlet. No more dying tablets, phones, or other small devices.

Can a power bank be used as a portable battery?

Ideally, you could pair a high-performing power bank with a high-quality solar charger or solar panel kit. That way, you can have power at your home and then take a portable battery with you when travelling in nature, keeping the device's solar panel in the sunlight to help keep the charge up.

Should I buy a solar power bank?

While it's not as effective as having a full-on solar panel kit for your home, a solar power bank could be a great little device for keeping your small devices charged up. Ideally, you could pair a high-performing power bank with a high-quality solar charger or solar panel kit.

Which solar power bank is the best?

The Solgaard Solarbank is our top pick due to its high value. It's light, durable, charges quickly, and stores up to 5 full phone charges. However, if you need a larger battery capacity, consider other options as well.
