

What changes are included in the solar package I?

It had previously passed through both the Bundestag and the Bundesrat on 26 April 2024. In addition to amendments to the Energy Industry Act (EnWG) and the Metering Point Operation Act (MsbG), Solar Package I also includes extensive changes to the Renewable Energy Sources Act (EEG).

What are the Energy Connectivity amendments?

The amendments provide examples of how different energy sources can combine their connectivity rights to optimize grid usage. The amendments also address the financial and operational aspects of connectivity. Developers must furnish guarantees and comply with timelines to avoid revocation of approvals.

Do solar projects have restricted scheduling during non-solar hours?

Conversely, solar-based projects or hybrid renewable energy systems (RHGS) will have restricted scheduling during non-solar hours unless they integrate with other sources like wind or storage. The amendments provide examples of how different energy sources can combine their connectivity rights to optimize grid usage.

Are battery storage systems affected by the electricity tax amendment?

In addition to rooftop PV systems, battery storage systems are also significantly affected by the recently published electricity tax amendment alongside the Solar Package I. According to this, the (partial) electricity tax exemption for battery storage systems is to be revised in order to avoid double taxation.

What does the New Energy Industry Act mean for the grid?

A new regulation in the Energy Industry Act means that the grid operator may no longer give priority to connecting renewable energy systems over (grey electricity) battery storage systems when connecting them to the grid. This is a first step towards harmonisation.

How will Germany achieve a 215 GW solar capacity target?

The legislative package is intended to promote the expansion of solar technology in Germany in order to achieve the target of 215 GW of solar capacity by 2030. To this end, a large number of legal amendments and simplifications have been adopted, which affect the wind and storage industry in addition to photovoltaic systems.

Now that an agreement has been reached, the amendment is to be passed by the Bundestag this week. "Photovoltaics currently cover nearly 15% of Germany's domestic ...

Commission (Grid Interactive Distributed Renewable Energy Sources) (Second Amendment) Regulations, 2023. 1.2 These Regulations shall come into force from September ...

Specifically, the amendments focus on accelerating the procedures related to rooftop solar installations, metering setup, and the duration of feasibility studies. By doing so, the government seeks to promote and ...

(2) "solar equipment," "solar electrical generating equipment" and "solar" are used interchangeably and mean photovoltaic panels and any other device or system that converts ...

to view the draft text amendment ZTA22-01 RE: Solar Energy Facilities. 04-19-22: Planning Commission Special Meeting to discuss first draft of ZTA22-01, Zoning Ordinance ...

Opponents called it a con job on the public, a wolf in sheep's clothing financed by the power companies so they could keep control of power in Florida and squash any ...

Companies face challenges in applying IFRS 9 Financial Instruments to contracts referencing nature-dependent electricity - sometimes referred to as renewable power ...

Since solar PV power installations are generally set up for a period of 25 years and solar PV cells and modules used in plants require long term warranty, it is desirable to ensure ...

The primary aim of the amendment of Renewable Energy Act (EEG) in 2024 is to remove obstacles to the expansion of solar energy and thus drive its expansion forward, in ...

These amendments aim to enhance the integration of renewable energy sources, particularly solar and wind power, into the grid by introducing new provisions related to restricted access and scheduling rights for different ...

with a dwelling that uses solar energy to reduce the energy requirements of the dwelling. It may be used to generate electricity for general usage or be part of a specific ...

Utah HB340 2025 General Description This bill modifies provisions related to residential solar energy generation by creating a new category for small portable solar generation devices ...

Commission (Renewable Energy Obligation) (Fifth Amendment) Regulations, 2019." (2) These Regulations shall come into effect from 01.04.2019. ... excess solar energy ...

The words "or from solar power plant set up by third party" shall be added after the words "who are receiving electricity from its own generating source" and at the end of the said ...

The amendment, known as the Second Amendment Regulations, 2024, was issued under the powers conferred by the Electricity Act, 2003, specifically Section 178 and Section ...

Amendment 1, called "Rights of Electricity Consumers Regarding Solar Energy Choice," has drawn fire for crowding out a more grassroots solar power amendment that failed ...

A voracious reader, a cleantech enthusiast, and a skilled professional in the media fields. Currently, covers the most complexities and recent insights in the booming clean energy ...

Draft - Kerala State Electricity Regulatory Commission (Renewable Energy and Net Metering) (Second Amendment) Regulations, 2024: [view](#). [view](#). [view](#). 4: Draft Kerala State Electricity Regulatory Commission ...

The new proposed local legislation, known as the Local Solar Expansion Amendment Act of 2022, will increase solar opportunities for DC-area residents and business owners. Revolution Solar is here to answer your ...

The amendment empowers the regulatory commission to specify a maximum time period, not exceeding three days in metro cities, seven days in other municipal areas, and 15 ...
