

How much does a 6 kW solar system cost in Ann Arbor?

A 6 kW solar system will cost about \$15,960 in Ann Arbor before incentives. After the 30% federal solar tax credit, this drops to \$11,172, or about \$1.86 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed, and how you finance it.

Do I need a solar battery in Ann Arbor?

No, you don't need to install a solar battery in Ann Arbor. Solar panels can operate and lower your electricity bill even without a battery. However, a solar battery might be a worthwhile investment in some cases. A battery can provide backup power and priceless peace of mind in places with prolonged grid blackouts or extreme weather events.
