

Why should you buy a solar powered backup camera?

Avoid messy wires and enjoy the benefits of a solar powered backup camera that uses the sun's rays to recharge the battery and wirelessly stream HD video to the included 6.8" motion-activated touch-screen monitor. With an extra battery built-in, enjoy double the run-time, especially on cloudy days or areas that get little sunlight.

What is a type s wireless & solar powered HD backup camera?

The TYPE S Wireless & Solar Powered HD Backup Camera is designed to withstand all weather elements, and will never fog up or cause the camera to be blurry. Add vision to your vehicle's rear view with the TYPE S Wireless & Solar Powered HD Backup Camera, featuring an integrated virtual parking assistant and motion-activated HD monitor.

How do I setup the type s wireless & solar powered HD backup camera?

With a wireless setup, you'll quickly and easily setup the TYPE S Wireless & Solar Powered HD Backup Camera by mounting to your existing license plate fixture and connecting the wireless HD monitor. For over 15 years, TYPE S has been leading the backup camera industry, continually investing new technology and innovation into customer safety.

What is a 3rd generation solar-powered backup camera?

The 3rd generation TYPE S Wireless Solar-Powered Backup Camera is the most powerful yet. With the addition of a second lithium-ion battery, the power capacity is now doubled to 5000mAh. Repositioned solar panels capture more sunlight, thus maximizing solar-charging efficiency.

What is the Yada app view wireless solar-powered adjustable backup camera?

The YADA App View Wireless Solar-Powered Adjustable Backup Camera combines the power of technology and the sun. This system has a built-in lithium-ion battery that recharges through the solar panel. Utilizing a 2.4Ghz digital signal, the camera transmits a 720P rearview video image to the smartphone and YADA Drive app without interference.

How long does a wireless backup camera last?

Never Worry About Battery: Keep your wireless backup camera charged with the solar panel in sunlight, or use USB charging in low-light conditions. The rechargeable battery ensures long-lasting power, keeping your back up camera wireless ready for extended trips. A single charge powers your backup camera for truck for 3-4 months.

Thanks to the very best solar-powered cameras on the marketplace, you won't have to fret about your camera losing power anymore. Article updated on February 18, 2025 at 1:08 PM PST Our Experts
