

What can you charge with a solar power bank?

Having a solar power bank means being able to charge all your electronics anywhere, any time. Say good-bye to dead mobile phones during travel or extended periods away from an outlet. No more dying tablets, phones, or other small devices.

Why should you get a solar power bank?

Having a solar power bank means being able to charge all your electronics anywhere, any time. Say good-bye to dead mobile phones during travel or extended periods away from an outlet. No more dying tablets, phones, or other small devices. Sunlight is all you need to charge your gear on the go. Talk about peace of mind!

Which solar power bank is the best?

The Solgaard Solarbank is our top pick due to its high value. It's light, durable, charges quickly, and stores up to 5 full phone charges. However, if you need a larger battery capacity, consider other options as well.

Can solar panels be used with power banks?

While most solar panels are not compatible with power banks due to their high output, look for one that has a USB-C port. These solar panels, typically in the 100W to 200W range, will be compatible with most power banks.

What are the two power options of solar power banks?

Most solar power banks have two power options - wall charging and solar charging. If you have a mobile phone and a tablet you'd like to keep powered up, then 2 USB ports would be preferable. Or, if you have a group of people, having more is even better.

What is the best solar power bank kit?

For peace of mind on longer trips, the Goal Zero is the best power bank kit you can get. When you're out in the middle of nowhere, rest assured that the solar panel will keep smaller electronics running smoothly.
