

What is a solar power bank?

A solar power bank is a portable device that can charge small appliances using solar energy. Jackery portable power banks are a popular choice when you're away from electricity, whether for an office trip or a family camping adventure.

Is a solar power bank worth it?

A solar power bank is useless if it gets easily damaged, which is why this one is designed to endure even the roughest of hikes. . The last thing you want with a power bank is for it to be slow to charge itself and slow to charge your devices, but the four panels on this one make it super efficient and speedy.

Do solar power banks really work?

That's where solar power banks come in. While some can get power from being charged themselves, the main appeal is their ability to turn sunlight into electricity to keep your phone and other items topped up. Out in the wilderness, whether it's just a long walk or a full hike, there are no outlets you can rely on to charge your devices.

What can you do with a solar power bank?

This is especially great if you have a base camp. Set the solar panel connected to your power bank in a bright sunny area, then go bag a peak, swim in a river, or take an afternoon nap while the sun charges your power bank for you! Then you can use your power bank to charge whatever your heart desires, instead of charging only one item.

What is the cheapest solar power bank?

One of the cheapest solar power banks on the market, this model from Pealiker still packs in plenty of features for under £25. The power bank has a 10,000mAh capacity, enough to charge an iPhone 8 more than twice over, and you can charge it via USB as well as through the solar panels.
