

Does New Brunswick have solar energy?

New Brunswick has the sixth-highest potential to produce solar energy in all of Canada. It receives more solar irradiation than most other provinces and territories. On average, a solar system in New Brunswick can produce 1142kWh of electricity per kW of solar panels per year.

Can I install solar panels in New Brunswick?

Let's dive into them: When installing solar in New Brunswick, the upfront costs are often the biggest barrier that property owners face. One program that homeowners can apply for is the Total Home Energy Savings Program offered by NB Power. It funds energy-efficient upgrades in the home, including the installation of solar panels in Canada.

Is solar a smart investment in New Brunswick?

Here in New Brunswick, making the switch to solar energy has never been more accessible or affordable. With rising power rates and a strong community focus on sustainability, homeowners, businesses, and even renters have some great opportunities to take advantage of financial incentives that make solar a smart investment.

Does New Brunswick offer solar energy incentives?

While there are at least 4 other energy incentive programs available in New Brunswick, businesses can now use the Federal Tax Provision for Clean Energy Equipment to fully expense their solar system. This means a CCA rate of 100% and the abolishment of the first year rule.

What are the benefits of solar in New Brunswick?

Residents can enjoy the following benefits of solar in New Brunswick: An investment opportunity. Think of solar systems as a long-term investment strategy. Not only will the solar panels pay for themselves by saving you on electricity costs, but they'll also improve the value of your home.
