

How does a solar bug zapper work?

Solar bug zappers are a great addition to any outdoor space. These devices use solar power to attract and kill pesky insects such as mosquitoes and flies. They work by emitting UV light which attracts the bugs, and then zapping them with an electric shock.

Why should you buy a solar bug zapper from LiToM?

The solar bug zapper from Litom offers multiple charging options and multiple insect attractant options for maximum functionality. For those mainly concerned with mosquitoes, you can turn off the UV light to avoid attracting beneficial insects and rely solely on the scented mosquito attractant included in the device.

Should you use a solar bug zapper?

To protect yourself against mosquitoes, a mosquito repellent device, spray, or yard treatment might be more targeted and effective. That said, if you think a solar bug zapper makes sense for your needs, I've combed Amazon for the best solar-powered options. 1. A Portable Solar Powered Bug Zapper

How many lumens does a solar bug zapper have?

This solar bug zapper provides three lighting modes, ranging from 60 to 180 lumens. It is convenient to hang, place, or hook whether outdoors or indoors where you want to prevent annoying flying insects. The weatherproof construction allows it to function well hassle-free on the outside, like porches, patios, or camping trips.

What is Palone solar bug zapper?

PALONE Solar Bug Zapper is a powerful and versatile mosquito killer that effectively keeps your area free from flies, mosquitoes, wasps, moths, and other flying insects. It uses a special wavelength UV light source and a 4500V high-power grid to attract and electrocute mosquitoes.

Are solar bug zappers waterproof?

Believe us, this solar bug zapper will be your lifesaver during camping trips. While preventing unwanted insects and bugs, it is very easy to set up thanks to the provided tree branch, string, and retractable hook. The exterior shell is waterproof IPX7 rated for holding up well under downpours.
