

What is a solar buyback plan?

Sometimes your panels may produce more energy than you need. With a solar buyback plan, you can sell that surplus energy back to the electricity company. There are many benefits to solar buyback plans. First, they provide an extra source of income, as you earn money from the excess energy produced. Second, they promote the use of renewable energy.

How does solar buyback work?

Let's break down the differences and spotlight how you can earn money by selling excess energy back to the grid with solar buyback. Solar buyback is about turning your solar panels into mini power plants that contribute to the grid. Here's how it works: 1. Selling Surplus You get paid for the excess solar electricity you contribute to the grid.

Can a net exporter buy back solar power?

You cannot be a net exporter, meaning you cannot sell more power than the amount you use. However, if you want to sell excess power back to the grid at the market price, then Champion Energy is our top recommendation for solar buyback. All of their electricity plans are eligible for solar buyback.

How does solar buyback work in Texas?

Net metering, also known as solar buyback, allows you to sell your excess solar power back to the grid. Your electricity company will buy your excess solar power from you and you'll receive the money as a bill credit. To participate in solar buyback in Texas, you will need:
