

Does Calgary have solar energy?

Calgary gets an average of over 2,300 hours of sunshine each year, making it perfect for solar energy! In recent years, more homes and businesses have started using solar energy. The benefits of installing solar PV systems on your home or business may include: Reducing the impacts of electricity cost changes on your utility bills.

Why should you install solar panels in Calgary?

With nearly 2,400 hours of sunlight each year, Calgary home and business owners can harvest this renewable and sustainable power source. Solar panel installation in Calgary includes opportunities for lower energy bills, increasing property values, lowering carbon footprints, and building a greener future.

Is solar energy a viable option in Calgary?

Yes, solar energy is abundantly available in Calgary, making it a viable and sustainable option for both residential and commercial use. How Much Does a Solar Panel System Cost? The cost of a solar panel system depends on various factors such as the size of the system, the quality of the panels, and installation costs.

How many solar panels are there in Calgary?

There are over 24 (and counting) solar PV systems installed on City buildings in Calgary. These systems can produce over 7 megawatts of power. The City also works with ENMAX to provide solar systems through the ENMAX Community Solar Fund. These solar projects are strategic investments in Calgary's economy and climate resilience.
