Should you use a portable solar panel Charger?

Portable solar panel chargers are meant to function as a source of backup power, not as the primary way to charge your phone every day due to their slow charging speed. The quality and efficiency of solar-powered phone chargers are improving over time.

How many devices can a solar phone charger charge?

With four large, high-performance solar panels and 15 watts of energy output, this charger can power up to three devices pretty efficiently. According to the company, it can charge a supported device to 50% in 30 minutes. This solar phone charger is heavier than others on this list, so it may not be best for those who already have a heavy pack.
