

How much does solar cost in Texas?

The cost of solar in Texas is higher than the national average, but with rising electricity rates and hot Texas summers, installing solar panels may save you thousands on your energy bills. Based on data from the Lawrence Berkeley National Lab, the average solar system in Texas costs \$4.01 per watt, while the average price in the U.S. is \$3.67.

Why should you install solar panels in Texas?

Installing solar panels can lower your energy costs, establish more energy independence, and increase your use of green energy. Energy Information Administration (EIA), the average electricity bill in Texas is \$156, which is about \$18 more than the national average. You can save thousands on energy bills over the lifetime of your solar system.

Can solar help rural Texas?

"Rural Texas can greatly benefit from solar, and this new tool will show lawmakers just how much large solar projects can contribute to rural communities," said Nakhia Crossley, central region director and counsel at the Solar Energy Industries Association.

What solar incentives are available in Texas?

The federal government offers the Residential Clean Energy Credit, a 30% tax credit on the total cost of your solar system. The federal credit alone could save you \$10,346 on an 8.6 kW solar system in Texas. Explore other Texas solar incentives in the following table.
