

Do solar panels work in Cornwall?

Solar panels absorb the energy from the light spectrum that we can see, but also from different wavelengths that can pass through thick clouds. So, although panels tend to work more efficiently in Cornwall, you'll still be able to utilise solar energy no matter where you live in the UK.

Are solar panels a good investment in Cornwall/Devon?

Solar PV panel installation is one of the most effective ways to reduce the carbon footprint of your property in Cornwall/Devon. Solar panels allow you to generate your own green electricity, which can help to offset your reliance on fossil fuels and help you on your journey towards net-zero emissions.

Are there solar panel grants available for Cornwall residents?

Currently, there are no solar panel grants available for Cornwall residents - or for the rest of the UK, for that matter. The government used to provide interest-free loans and grants as part of the Green Deal, but this finished in 2015.

Can I get free solar electricity in Cornwall?

Free solar electricity (solar PV) or solar hot water systems are now available for eligible households in Cornwall, but you must have applied before the end of March 2022.

How many solar sites are there in Cornwall?

According to Stelrad's study, there are 18,076 solar sites in Cornwall - the highest number across the UK. The report analysed data from the Department of Business, Energy & Industrial Strategy and found that the South West region produces the most renewable energy in the UK, with Cornwall taking the top spot.

Is Cornwall's solar success leading the UK to net-zero?

Cornwall's solar success is certainly leading the UK to its net-zero target for 2050 - but there's still a lot more work that needs to be done. In the coming years, the county is set to facilitate a handful of new solar farms, which will further increase the UK's solar capacity.
