

How much does solar cost in New Zealand?

The cost of solar panels and solar power energy systems in New Zealand has become more affordable over the years. Just eight years ago, a 3kW system would cost around \$40,000, while today the same system could be installed for less than \$9,000. When you're looking at Solar, we will put you in touch with two of New Zealand's top Installers.

How much does a 5 kW solar system cost in New Zealand?

In 2023, a typical 5 kW solar power system in New Zealand costs around \$13,500. Like most other things, the larger a system, the lower its cost per watt. For instance, a small, 2 kW system may cost around \$7,500, which comes down to about \$3.75/W. On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W.

What is the cost of a solar system?

The cost of solar panels and solar power energy systems has significantly decreased over the years. Today, a 3kW system can be installed for less than \$9,000. Eight years ago, the same system would have cost around \$40,000. As equipment and processes become more developed and efficient, prices drop.

Are solar panels a good investment in New Zealand?

A solar power system in New Zealand can easily earn a 10 to 15% return on investment. This rate of return is likely to increase each year as the price of electricity continues to climb. If you're unsure if solar panels on your roof will be worthwhile or if the upfront cost will lead to a good payback, consider the potential returns.

How much does a solar system cost per watt?

Like most other things, the larger a system, the lower its cost per watt. For instance, a small, 2 kW system may cost around \$7,500, which comes down to about \$3.75/W. On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W. Let us dive a little deeper.
