

What is the cost of solar in Queensland?

The cost of solar in Queensland varies depending on the system size. Small solar systems (less than 3kW) generally cost \$4,000 or less, while 4kW systems or larger will set you back upwards of \$4,400. Despite the cost, solar is considerably cheaper in Queensland than in most other states and territories.

How can I save money on solar energy in Queensland?

Maximise your savings by using as much of your solar energy as possible during the day. Excess energy exported to the grid earns feed-in tariff credits but at a lower rate (typically 6-10 cents per kWh) than what you'd pay for grid electricity. Queensland's feed-in tariffs vary by electricity provider.

What are Queensland solar & battery rebates?

Solar rebates and incentives are designed to make clean energy more affordable for homeowners and businesses across the Sunshine State. In this guide, we'll break down what you need to know about Queensland solar & battery rebates in 2024.

Who has the best solar feed-in tariff in Queensland?

Origin has the best solar feed-in tariff in Queensland at the time of publishing, with a generous 20 cents per kilowatt hour (kWh) on offer to eligible customers. The next best FiT rates come from AGL with 15c/kWh and EnergyAustralia with 12c/kWh.

Are solar panels available in QLD?

Yes, some solar-specific products are on offer in QLD, however these deals are few and far between. Most larger companies, such as AGL and Origin, will generally have solar-specific plans available, but it normally requires certain conditions to be met, such as purchasing solar panels through the energy retailer.

Will Queensland's solar panel rebate program Save you Money?
