

What is the Solar Energy Industries Association (SEIA)?

The Solar Energy Industries Association, or SEIA in short, is the national solar trade association in the United States. Its primary aim is to build a strong solar industry in America through advocacy.

What is the Smart electric power alliance (SEPA)?

The Smart Electric Power Alliance (SEPA) is a nonprofit organization that aims to make the world carbon-free by 2050. And they believe that in order to help achieve that goal, they have to facilitate the electric power industry's transition to a clean energy future through education, research, and collaboration.

What is solar Powering America?

Solar Powering America aims to make it simple for communities, businesses, organizations, and state and local governments to both learn about and commit to choosing solar. Aside from that, it also serves as a central hub where organizations can make commitments and track the progress in deploying solar.

How does SEPA help community solar programs?

By producing a range of more standardized, streamlined and cost-effective business models that can be easily localized across the country, SEPA will spark the growth of community solar programs. For more information on this award and the Solar Market Pathways program, visit their website .

What is the International Solar Energy Society (ISES)?

The International Solar Energy Society (ISES) is a nonprofit UN-accredited membership NGO that was founded way back in 1954. Its primary goal is to become the trusted global advisor on renewable energy.

Does Seia have a Tax Guide for solar energy?

SEIA produced the original "Federal Tax Guide for Solar Energy" nearly a decade ago, and has continued to maintain and update this resource in an effort to ensure that the industry will make responsible and best use of the solar tax incentives. Version 10.0 of the tax manual is now available for members to access.

In response to the continuing evolution of solar and clean energy, the Solar Electric Power Association (SEPA) will officially become the Smart Electric Power Alliance on ...

Solar is one of the fastest-growing energy sources in the United States, but it can only realize its full potential when partnered with complementary technologies that are ...

Dakota Electric Association members are now receiving electricity from a new 1-megawatt (MW) solar facility built specifically for the cooperative's member-owners. The solar array is located along Hwy. 316 south of Hastings. ...

Valley Electric Association has been innovating new technologies in Southern Nevada for more than 50 years.
