

What is a solar gate opener?

Quite simply, it's an automatic electric gate opener with solar-powered capabilities. Because gates are often installed far from a hard-wired power source, users need alternative methods for powering the gate for daily use. Solar is an effective method of power generation if the opener is in an area that receives ample sunlight.

What is a solar-powered gate?

A solar-powered gate is a modification of an automatic gate that operates using rechargeable batteries and solar power instead of being reliant on utility providers. If you have a large property, a solar-powered gate is a more convenient way to authorize entry and exit and secure it.

How do solar-powered gates function?

Solar-powered gates function by using batteries to store the direct current from the solar panels. If installed with no shade or obstruction, the solar panel will trickle-charge the car battery or deep cycle battery for night use. The sun will help you automatically lock and unlock your gate during the day.

Do you need a solar gate opener?

Above all, you need a solar gate opener compatible with your gate and rated to handle its size. If you don't purchase the proper opener, solar power will be the least of your concerns. Energy generated by solar panels is stored in batteries until you need it. Typically, a solar-powered gate opener will require 12V, 7A rechargeable batteries.

Does the electric gates shop offer solar powered gates?

Yes, The Electric Gates Shop offers solar powered gates. These gates will continuously run without charge if energy is good and in the long run will save you money. We offer a range of 12/24 and 36v gate opener systems all with the ability to run on solar power.

Can a solar gate opener work with a rechargeable battery?

Solar-powered gate openers can also work in conjunction with rechargeable batteries, giving you the option to recharge the battery backup yourself if the solar energy stored is inadequate for regular use. You can also use solar power in combination with a hard-wired gate opener to operate the gate in the event of a power outage.
