

How do solar fairy lights work?

Solar fairy lights consist of a main unit with a solar panel, a string of LEDs, and a few fixings. The LEDs are wired in two sets of 50 in opposite directions. This means that when you apply power directly to the LED cable, only half of the lights will turn on. So, the solar panel charges a battery during the day, and the battery powers the lights at night.

What are LED solar fairy lights?

LED solar fairy lights are a type of decorative outdoor lighting designed to create an exceptional festive, cheerful, and joyful environment. They are perfect for enhancing the atmosphere around your home, patio, garden, and more.

Are solar-powered fairy lights eco-friendly?

Solar-powered fairy lights stand out as the go-to solution for creating a magical ambience without a carbon footprint. As Australians increasingly seek sustainable and enchanting ways to brighten their homes and gardens, these lights are an excellent choice. Create, make peace and love and let your life shine like thousands of sparkling LED lights powered by solar.

What colours can solar fairy lights be?

Solar fairy lights can come in various colours, including warm yellows, cool whites and even multicolours. The brightness and colour temperature of the lights can make a significant difference to the mood you wish to create.

What are solar fairy lanterns used for?

Solar fairy lanterns are used to establish a romantic, cozy, or holiday spirit and background in various settings such as cafes, bars, and restaurants. They are also essential for outdoor party decoration and often used to welcome guests at home entrances.
