

What is a PPA in solar financing?

The third option for financing a new solar system is to enter into a power purchase agreement (PPA). If you choose a solar loan, it's similar to financing a car or paying off your mortgage -- you'll be required to make fixed monthly payments over your loan term, which is usually anywhere from five to 25 years.

How do I finance a solar energy system?

The average homeowner doesn't necessarily have \$20,000 - \$30,000 on hand to pay for solar panels, which is why taking out a solar loan is one of the most common ways to finance a solar energy system. You can also finance your solar energy system with other types of loans such as a home equity loan and or HELOC.

Can I finance my solar energy system with a loan?

You can also finance your solar energy system with other types of loans such as a home equity loan and or HELOC. We'll walk through all of your choices and explain why they do or don't make sense for your particular financial situation when it comes to paying for solar panels.

Should you pay for solar panels with a loan?

You still own your solar panels if you pay for them with a solar loan, which means you're eligible for valuable tax incentives like the federal solar tax credit, which saves you thousands of dollars on the cost of your solar system. Low-interest loans are not always the cheapest financing option.

What is public financing for solar projects?

Public financing involves government agencies developing solar projects that can benefit a community. For instance, a local municipality can set up a solar farm and permit the community to access solar power. As the world shifts to using renewable energy, there's an increasing need for public financing focusing on solar projects.

Are there affordable solar financing options?

Despite rising interest rates, there are still plenty of affordable solar financing options. Over 2.5 million homeowners in the U.S. have installed solar systems, making it a smart investment that increases your home's value and saves you money on electricity costs.
