

What makes solar power so lovable?

The playful summer vibes of the lead single are there in some places -- "Dominoes," for example, sounds like it should be played on a beach in Hawaii -- but it's a witchier kind of sun that Lorde is worshipping, and her world now is one of sage, crystals, and drying-out bones. Ultimately, what makes Solar Power so lovable is that it's deeply uncool.

What does solar power feel like?

Sonically, the tracks on Solar Power feel as if they blend into one, but it doesn't feel same-y. It gives it a sweet, psychedelic, meandering feeling that lets you sink into the album rather than feel jerked into the next track -- more than an album, it is a vibe.

Will solar power be a 'unstoppable force'?

Hydropower - produced by running water, usually from rivers or reservoirs, and the world's oldest and largest single source of renewable power - has hovered at 14%. Phil MacDonald, Ember's managing director, said: "Paired with battery storage, solar is set to be an unstoppable force."

Is solar power a melodrama?

The album is stripped back, with plucked strings, an 808 drum machine, and vocals that feel as if she's breathing right in your ear. Solar Power was instantly divisive: for the wait, for its natural deviations from Melodrama, for Lorde's decision to not release CDs at all for environmental reasons.

Could 'solar power' be a smash?

The result is Solar Power, a weird, meandering album that is an exercise solely in fulfilling her own desires. Speaking to the New York Times last year, Lorde dismissed any idea that the album could be a smash, saying that she felt like she "could just chill out and flex a little bit."

Does Lorde's 'solar power' influence Taylor Swift & Lana Del Rey?

Solar Power marks the second time Lorde has worked with Jack Antonoff, which might inspire Taylor Swift or Lana Del Rey comparisons. But no, its influences feel a lot less "cool": Cat Stevens, Simon and Garfunkel, even the Mamas & the Papas.
