

Are solar panels free?

The Department of Energy is aware of claims of offers for free solar panels or that solar companies must provide solar panels for free if requested. However, the federal government does not offer any programs for free home solar panel installations nor does the government require companies to grant solar panels for free to customers.

Does the federal government offer free solar panels?

The federal government does not provide free solar panels, but does provide incentives that reduce the cost of going solar. You can go solar with no upfront cost by taking out a \$0-down loan, signing a lease or PPA, or subscribing to a community solar farm. Of the no upfront cost solutions, \$0-down loans provide the best long-term savings.

How do I get a free solar panel?

You can also give us a call at 1-800-SUNPOWER to speak with a solar advisor today. While "free solar panel" offers are common, that's usually not the whole story. Often, it's actually a solar lease or power purchase agreement with \$0 down, meaning "free" only lasts until the first monthly payment is due.

Should you sign up for free solar panels?

Unsolicited leads from door-to-door salespeople: If a salesperson knocks on your door offering free solar panels, don't sign up for anything until you carefully research the company and its products. High upfront costs and hidden fees: Avoid signing a contract for "free" solar panel systems if a high upfront cost is still involved.

Is the offer of free solar panels a scam?

If offers of free solar panels sound too good to be true, it's because they are. Solar panels cost money, and these ads are, at best, misleading attempts to push solar leases and, at worst, complete scams.

Should you install free solar panels on your property?

Installing "free" solar panels on your property comes with multiple nuances. While you may not incur upfront costs, you will still have to pay later. Here's how it works. Solar power is something everyone on the planet gets for free. However, the process of turning it into usable energy is expensive.
