

Why should a business install commercial solar panels?

Reduce Your Energy Costs: One of the main reasons most businesses install commercial solar panels is to reduce their electricity bills. With the help of these panels, businesses can generate their own electricity and power facilities like lighting, air conditioning, etc which can save their electrical expenses by over 75%.

How can a commercial solar system benefit your business?

You can finance your system with a solar loan or choose a third-party ownership arrangement like a lease or power purchase agreement (PPA), though you won't be eligible for the direct benefit of tax incentives if you don't own your system. 2. Your business can save thousands with solar Commercial solar provides a great return on investment.

How much money can a small business save with solar?

The average mid-sized or small business will save about \$101,259 in electricity costs with solar. Going solar can help your business attract more customers and better employees. Commercial solar projects support your local economy. EnergySage offers a solar concierge service to easily get quotes for your business.

Should your business go solar?

Studies by McKinsey & Company and NielsenIQ show that consumers are willing to pay more for sustainable products. Going solar will lower your company's carbon footprint, helping you build a sustainable brand. It could even help you gain positive media attention and raise brand awareness among your customers.

Are commercial solar panels a good investment?

Commercial solar panels generate a high amount of electricity. You can also send the excess electricity back to the grid and enjoy the benefits of net metering. In return, you will receive credits on your energy bill. These credits will help you lower the cost of your energy bills, offering financial benefits.

How much energy does a commercial solar panel produce?

The energy output of commercial solar panels depends on the system size, panel efficiency, and sunlight availability. Most commercial solar panels produce between 250 and 500 watts of power.
