

Can nonprofits benefit from solar energy?

The Inflation Reduction Act of 2022 provides a transformative opportunity for nonprofit organizations to benefit from solar energy through the Direct Pay option. With the solar Investment Tax Credit covering 30% of installation costs, nonprofits can now enjoy significant financial relief and long-term savings.

Can a non-profit get a solar energy grant?

To find out what PACE financing is available in your area, visit PACENation's website. In addition to PACE financing, your state and/or utility may have other solar energy grants for non-profit organizations. One state in the Mid-Atlantic stands out for its efforts in making solar installation possible for non-profits -- New York.

Are solar panels a good investment for a non-profit organization?

Solar energy is an investment that will pay your organization back over the years with free electricity. Whether it's to slash your electricity costs, reduce your carbon footprint, or a little bit of both, installing solar panels for non-profit organizations can be a great way to get your company recognized and supercharge your mission.

Are nonprofits eligible for solar incentives?

In the past, nonprofit organizations weren't eligible for one of the most significant solar incentives because they didn't have the tax liability required to qualify. However, 2022's Inflation Reduction Act changed that. In addition to this 30% discount, other non-profit solar incentives and financing options are available.

Does a nonprofit organization need solar?

Many nonprofit organizations are committed to cleaner, green energy, and going solar is one way to meet those goals. Installing solar decreases your organization's overall carbon footprint because carbon dioxide emissions are typically generated from coal or natural gas-based electricity.

How can nonprofits benefit from the solar investment tax credit?

With the solar Investment Tax Credit covering 30% of installation costs, nonprofits can now enjoy significant financial relief and long-term savings. By creating a Clean Energy Account on the IRS website and following the registration steps, nonprofits can take full advantage of this incentive.
