

Where can you use solar-powered outdoor lights?

You can use them just about anywhere there is sunlight exposure--no outlet required. They're powered by solar cells that convert sunlight into electricity, which is then stored in an internal battery.

What are the benefits of using solar-powered outdoor lights?

Using solar-powered outdoor lights can set that glowing backyard ambiance in a more sustainable way, and eliminates the need for long, ugly cords or constant battery replacement. They're powered by solar cells that convert sunlight into electricity, which is then stored in an internal battery.

How do solar-powered outdoor lights work?

Solar-powered outdoor lights are powered by solar cells that convert sunlight into electricity. This electricity is then stored in an internal battery, allowing you to use them just about anywhere there is sunlight exposure--no outlet required.

What type of bulbs do solar-powered outdoor lights use?

Almost all solar-powered outdoor lights use LEDs, with either integrated or replaceable bulbs. Because they are designed for outdoor use, most solar-powered lights offer decent water and weather resistance.

Are solar outdoor lights environmentally friendly?

Yes, solar outdoor lights are environmentally friendly in several ways. First, they do not tie into the electricity grid, so they have no operating greenhouse gas emissions. This means they have a much lower carbon footprint than traditional outdoor lighting.

Are solar-powered outdoor lights water-resistant?

Almost all solar-powered outdoor lights are LEDs, with either integrated or replaceable bulbs. Because they are designed for outdoor use, most solar-powered lights offer decent water and weather resistance. The level of resistance varies from light to light; pay close attention to each model's weather resistance rating.
