

Are solar panels a good option for renters?

The simple answer for renters who want solar panels for their apartment or house is that it's possible!

How can a renter benefit from community solar?

If you're a renter looking to benefit from solar, the best way to start is to compare community solar projects on the EnergySage Community Solar Marketplace. By subscribing, you can filter by all sorts of project details, read about individual developers and panel locations, and compare your estimated yearly savings.

Can a homeowner lease or rent a solar power system?

No, only the homeowner can enter an agreement to lease or rent a solar power system. Solar leases and rentals are designed to be long-term arrangements, so there's a big financial penalty for removing the solar panels before the contract term is up.

Is solar a good investment for a tenant?

Renters typically have a harder time, especially in an apartment building. Unless your landlord recognizes the value of going solar and is willing to make the investment--it doesn't hurt to ask--you might feel like it's out of your hands. But there are still ways to tap into solar as a tenant if you're willing to think outside the box a bit.

- 1.

Can you go solar if you rent a house?

If you rent your home and find that you aren't the right fit for community solar, you can still go solar in some other unorthodox ways, but components such as inverters can get expensive. The most straightforward option may be to ask your landlord or the company that owns your building to install panels.

Can a landlord install a solar panel system?

While you may be able to pitch your landlord to install a rooftop solar panel system, community solar is more likely to be your best bet to enjoy the benefits of solar if you don't own your roof space through incentives like virtual net metering, community solar participants can earn credits back on their electricity bill, saving money every month.
