

Solar power free market financing act of 2025

What will happen to the 30% federal solar tax credit in 2025?

With President Trump returning to the White House and the GOP controlling both the House and the Senate a lot of people are wondering what might happen to the 30% federal solar tax credit in 2025. As of March 2025, this tax credit is still law and taxpayers can claim this credit for their investments in solar and/or battery storage projects.

Will the solar tax credit be phased out in 2026?

There are a few scenarios at play. The first would be an early phase-out of the solar tax credit starting in 2026 or 2027, most likely with the 4% reduction in tax credit value glide path. Another scenario is tying the tax credit eligibility to a certain domestic content threshold.

Is the solar tax credit still legal?

As of March 2025, this tax credit is still law and taxpayers can claim this credit for their investments in solar and/or battery storage projects. *This article is for informational purposes only and does not constitute legal or tax advice. Why Are People Concerned about the Solar Tax Credit Going Away?

How long does the solar tax credit last?

The Inflation Reduction Act of 2022 extended the tax credit at the 30% rate through 2032, at which point the tax credit declines 4% per year through 2034. The solar tax credit has been a relatively durable piece of policy and has survived both Republican and Democratic administrations, recessions, wars, and other policy uncertainty.

When did the solar investment tax credit come back?

It was then brought back in 2005 and with some tweaks and changes has persisted ever since. It's often referred to as the "Solar Investment Tax Credit" or ITC for short. The Inflation Reduction Act of 2022 extended the tax credit at the 30% rate through 2032, at which point the tax credit declines 4% per year through 2034.

Will interest rates be lowered in 2025?

Although interest rates are stubbornly high, they likely won't be substantially lowered in 2025. If they're lowered in the future solar loans can easily be refinanced. And, your utility won't be slowing down their rate increases any time soon.
