

How do solar gable attic fans work?

Solar gable attic fans work by using sunlight to power the fan's motor. This helps prevent heat and moisture build-up in your attic. Your attic can reach temperatures of up to 150 °F, which can damage your home's integrity and even destroy your roof due to the humidity and moisture build-up.

What is a solar-powered attic fan?

A solar-powered attic fan is a device that equalizes interior and exterior temperatures, safeguarding your home from the worst of winter. It removes excess humidity from sources like showers, humidifiers, and dishwashers. Additionally, it prevents leaks and structural decay triggered by ice buildup on your roof, and avoids damage to insulation and framing materials caused by moisture accumulation.

What is the biggest solar attic fan?

Solatube Home's Roof Mount 2400 Solar Attic Fan is the biggest solar attic fan we offer. It boasts an industry-leading 35-watt solar panel that generates maximum energy for major air movement when summer hits.

Is investing in a solar attic fan beneficial?

Solar attic fans can prolong the life of your roof structure and air conditioning while helping you save up to 30% on A/C costs. This makes investing in a solar attic fan a beneficial decision. QuietCool's solar-powered attic ventilation products may also qualify for a Federal Tax Credit.
