

What is a power hat?

Sign up for daily news updates from CleanTechnica on email. Or follow us on Google News! The Power Hat, a brand-new product from EcoFlow, is a lightweight and durable hat with solar cells integrated into its brim for 360° of solar coverage, with both USB-A and USB-C output ports.

How much does a power hat cost?

Or follow us on Google News! The Power Hat, a brand-new product from EcoFlow, is a lightweight and durable hat with solar cells integrated into its brim for 360° of solar coverage, with both USB-A and USB-C output ports. It will eventually retail for \$129, but if you pre-order now, you can save \$50, paying just \$79.

How does a solar hat work?

During the charging process, the hat's solar panels on the brim convert 24% of absorbed solar energy into electricity, with the energy converted into heat reduced to 66%. Compared to a standard black hat, it has a lower surface temperature, providing a cooler experience. Lightweight and comfortable for extended wear.

Why should you buy a solar hat?

Ultra-lightweight & Portable: At only one-eighth the thickness of conventional solar panels, it's lightweight, thin, and comfortable for extended wear. The sun hat easily folds and fits into a backpack for convenient storage, making it the ideal choice for outdoor hiking.

Can a power hat be used for charging?

Alternatively, the Power Hat doesn't have to be worn to be used for charging, as it can simply be unfolded and placed in the sun for free power just about anywhere. The EcoFlow Power Hat can be folded into quarters for storage, comes in two adjustable sizes, is IP65 waterproof-rated, and weighs just 13 oz (370 g).
