

What is a solar-powered blanket?

In an effort to bring renewable energy to those who need it, Central Saint Martins design graduate Mireille Steinhage has invented a solar-powered blanket that is made from conductive yarn. The Solar Blanket is a solar-powered heated blanket that can be wrapped around a person or draped over a sofa to direct heat toward those sitting on it.

How does a solar-powered heated blanket work?

A solar-powered heated blanket uses solar energy to generate electricity that eventually heats up the blanket. On average, an electric blanket consumes 100-400 watts of power, depending on its size, brand, and model. The best way to charge the electric blanket is by using a solar generator.

What are the benefits of solar power heated blankets?

Aside from reducing the carbon footprint and utility bill, solar power heated blankets offer multiple other benefits. They are portable and safe solutions that keep you warm during traveling. In addition, they are lightweight and make it easy to carry anytime, anywhere.

What is a 240W solar blanket?

240W Solar Blanket Kit by REDARC features everything you need for a portable and flexible charge between car and campsite. 160W Monocrystalline Solar Blanket from REDARC is the perfect camping solar panel for weekend getaways and remote travel.

Could a solar blanket make a big difference?

Steinhage started working on People Power in 2020, before this year's energy and cost-of-living crises, but identified the heated blanket as a product that could make a big difference to people if it were made with renewable energy. "Solar Blanket is different from a standard electric blanket as it uses solar power to heat up," she told Dezeen.

Is it time to choose a solar-powered electric blanket?

If yes, it's time to choose a solar-powered electric blanket ! A solar-powered heated blanket uses solar energy to generate electricity that eventually heats up the blanket. On average, an electric blanket consumes 100-400 watts of power, depending on its size, brand, and model.
