How much does solar cost in Huntsville AL?

The average price per watt of solar power in Huntsville, AL is \$3.26/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$30,124 for a 13.18 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

How much does a 6 kW solar system cost in Huntsville?

A 6 kW solar system will cost about \$14,700 in Huntsville before incentives. After the 30% federal solar tax credit, this drops to \$10,290, or about \$1.72 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed, and how you finance it.

Are solar incentives a good idea in Huntsville?

Solar incentives and rebates can cut the cost of installing solar in Huntsville by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.

Why did solar technology Alabama install a grid tied PV system?

Solar Technology Alabama installed a grid tied PV system on our gymnasium to help offset some of the energy consumed by 30 tons of air conditioning. Ron Holland is a very conscientious and knowledgeable person who takes the time to answer any question you may have about what he is installing.
