

Does Idaho have solar power?

Although wind energy contributes approximately 17% of Idaho's electricity, the Gem State and solar development have not exactly gone hand-in-hand in recent years. That said, the state's renewable energy capacity is about to increase immensely, thanks in large part to new solar installations coming online.

What is the largest solar facility in Idaho?

Jackpot is now the largest solar facility currently operating in Idaho, supplanting Grand View Solar Two. In late 2025, Jackpot will likely pass the crown to the 200 MW Pleasant Valley Solar, which broke ground in Boise last summer.

Does Duke Energy have a solar project in Idaho?

In January of last year, Duke Energy started commercial operations at the 120 MW Jackpot Solar project in Twin Falls County, which provides energy to Idaho Power through a 20-year power purchase agreement (PPA). Jackpot is now the largest solar facility currently operating in Idaho, supplanting Grand View Solar Two.

Does Idaho have a solar farm?

(Boise Solar, a 54 MW ac solar project developed by Origis Energy. Courtesy: Origis Energy) For the first time, the Idaho State Board of Land Commissioners has voted to approve a lease for a solar farm on state-owned property.

What upcoming solar projects are coming to Idaho?

Other upcoming solar projects of note include Clenera's Crimson Orchard Idaho, a 120 MW solar site with 400 MWh of paired battery storage expected to be operational in Q3 2026. SEIA predicts a steady flow of utility-scale projects coming online through 2029, significantly altering the state's clean energy mix.

Will solar on farmland be a major business opportunity in Idaho?

Nearly half of solar developers surveyed believe that solar on farmland will make up a majority of their future business opportunities. Although wind energy contributes approximately 17% of Idaho's electricity, the Gem State and solar development have not exactly gone hand-in-hand in recent years.
