

What is the Illinois Solar Energy Association?

The Illinois Solar Energy Association (ISEA) is a non-profit organization that promotes the widespread application of solar and other forms of renewable energy through education and advocacy. ISEA is the state resource for renewable energy related policy developments, educational classes, events and access to local renewable energy vendors.

What is Illinois Solar For All?

Illinois Solar For All (ILSFA) is a state program that provides an incentive for solar PV systems for low-income and environmental justice communities. SA Energy LLC, an organization that generates solar energy, has worked in conjunction with ILSFA to provide energy savings to individuals who subscribe to the service.

How much solar power does Illinois have?

In 2011, the limit was raised to 2 MW, but is not net metering, as the term is commonly known, as it uses two meters for systems larger than 40&#160;kW. As of 2022, Illinois ranks 17th nationally in cumulative installed solar capacity. There is enough solar energy installed in the state to power 217,000 homes.

Is it a good idea to have solar farms in Illinois?

Solar farms in Illinois are a good idea for providing clean energy at a discount to those who cannot access solar power on their rooftops. There's no doubt that Illinois is on track to boost renewable energy.

Why should you consider a solar project in Illinois?

Recent legislative updates have streamlined permit processes, reduced waiting periods, and expanded eligibility criteria, making renewable energy more accessible than ever for Illinois residents. For property owners considering solar installation, this convergence of federal, state, and local incentives creates a unique window of opportunity.

How many solar farms are there in Illinois?

There are around 38,000 solar farms in Illinois, generating clean, renewable energy. Many of these farms are community solar projects that allow people to subscribe to the project and receive power based on their subscription level.

**Cheaper energy bills:** The average homeowner in Illinois uses a lot of power, which adds up to a lot of savings when you switch to solar. Going solar now means that your monthly ...
