

Is Colorado a good place to install solar panels?

Colorado is a great place to install solar panels with programs like Xcel's Solar\*Rewards earning you extra money for every kilowatt-hour of electricity your panels generate. Rebates are also available for residents of Boulder and Colorado Springs. Xcel has released this nice program, and we know expert local installers.

How much do solar panels cost in Colorado?

In Colorado, a typical residential solar panel system costs \$10,605 to \$30,300, depending on the size of your system and what financial incentives you qualify for. The 30% federal solar investment tax credit (ITC) is the most significant financial incentive for most homeowners buying solar panels in Colorado.

Are solar panels a good investment in Colorado?

The average Colorado solar shopper will save \$4,350 on solar panels with rebates and incentives. Solar panels are a great investment for Colorado residents, thanks to a rock-solid net metering policy and lots of local and utility level incentives--not to mention the big federal clean energy tax credit.

How much does a 5 kW solar system cost in Colorado?

The average cost for a 5 kW solar panel system is around \$14,500 in Colorado. Once you factor in the 30% credit, the cost comes down to \$10,150. When you file your federal income taxes, you can claim this incentive as a credit towards your federal tax bill.

Is there a solar tax credit available in Colorado?

In Colorado, there are solar tax credits and incentives available at the federal, state, and local levels. You can check the value of all incentives your home is eligible for using the calculator above. The state's commitment to renewable energy is strong, with a goal of 100% electricity coming from carbon-free renewable sources by 2050.

Are solar panels tax deductible in Colorado?

The federal solar investment tax credit (ITC) is still the biggest incentive for many Colorado homeowners. If you install a residential solar panel system by the end of 2032, you can get a tax credit equal to 30% of the system's total cost -- including equipment, labor and permits -- on your federal taxes.
