

Does Maine have solar energy?

The available sunlight in Maine is generally conducive to solar energy. The state as a whole receives 192 sunny days per year, which is often plenty for homeowners to see substantial value in their solar panels.

How much do solar panels cost in Maine?

The average Maine homeowner needs a 10.15 kW solar panel system to cover their electricity needs, which comes out to \$33,080 before incentives. Prices range from \$28,118 to \$38,042, but after the federal tax credit, that drops by 30%. While this is a lot of money, adding solar panels will help you avoid paying Maine's high electricity rates.

Are solar batteries worth it in Maine?

Solar batteries don't make much financial sense for Maine homeowners anyway, because the net metering policy is so consumer friendly that you don't really benefit from hoarding your solar power. None of the utility companies in Maine offer a virtual power plant program for homeowners, either.

Does Maine have a community solar program?

AUGUSTA, Maine -- Maine's community solar program, commonly known as net energy billing, has been wildly successful in incentivizing the development of small-scale solar power projects. They've popped up like mushrooms as developers chase the deals codified by state lawmakers, allowing them to sell power at a premium above market rates.

How many solar installations are there in Maine?

Some 3,185 installations are in place across Maine, according to the Solar Energy Industry Association. In Penobscot County, Versant Power has a raft of pending requests from developers to connect proposed solar projects to the grid. It's an industry that one energy lawyer called "booming."

Should you install solar panels in Maine?

Solar is more valuable in sunny areas, as more abundant sunlight means more energy production, which means more potential savings. Maine receives around 192 sunny days per year, which is below the national average of 205 days. Still, this is typically enough available sunlight to make solar panel installation a worthwhile endeavor.

Up from 62 megawatts in 2019, Maine now has 977 megawatts of solar energy installed, with more in the pipeline, though some of those projects may not ultimately come to fruition given challenges with connecting to the ...
