

Are there solar panels in Melbourne?

According to the Australian Photovoltaic Institute, over 70% of rooftops in suburbs like Clyde already have solar power. The overall adoption rate across Melbourne is lower, with an estimated 25% of homes having installed solar panels. What is the best orientation for solar panels in Melbourne?

How much power does a solar system produce in Melbourne?

Melbourne receives one of the highest sunlight intensities in Australia. This translates to a high power output compared to other cities. On average, a 6kW solar system generates around 24.5kWh daily, which is enough to run a home. However, several factors affect the efficiency of a solar panel and hence, its output.
