

Is New York a good state for solar energy?

Despite receiving less sunlight than much of the country, New York State is one of the leaders in residential solar adoption and ranks sixth for projected growth over the next 5 years. This is largely due to the state having some of the highest electricity prices and arguably the best solar incentives.

Does New York have a solar system?

In New York, the sun shines for everyone. New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers.

Is it a good time to go solar in New York?

New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers. Combined with declining equipment costs, New York State tax credits, and Inflation Reduction Act tax credits, there's never been a better time to go solar.

How many solar projects are there in New York?

New York is home to more than 800 community solar projects and leads the U.S. in community solar capacity. Statewide, New York's solar energy development is driving economic growth and employing more than 14,000 workers in a variety of solar energy careers.

Does New York Power Authority own a 20 megawatt solar project?

Large-Scale Renewables Project to Create More Than 100 Union Jobs Governor Kathy Hochul today announced that the New York Power Authority (NYPA) has acquired full ownership of a 20 megawatt (MW) solar energy generation project in the town of Fort Edward in Washington County.

How many solar panels will NYC have by 2030?

NYC is targeting 1,000 megawatts of solar citywide by 2030, enough to power 250,000 homes. Solar panels allow buildings to generate their own emissions-free electricity and save residents money by reducing how much electricity they need to buy from their utility.
