

How are solar panels installed in Newcastle?

For solar panel installation in Newcastle, the process begins with a consultation and site inspection. Our crew will visit your location to check the areas where we can install the solar panels and review your regular power consumption to determine the solar power capacity you need.

Who are Newcastle Solar Power?

Newcastle Solar Power is the trusted solar installers in Newcastle, NSW. They have installed a significant percentage of residential solar systems in the area, working on projects ranging from small to large-scale solar panel systems.

How much does a 10kW solar panel cost in Newcastle?

The 10kW Solar Panels are the best value system for Newcastle residents with large homes. The price of a 10kW solar panel system starts from \$3,700. The 6.6kW Solar Panels are ideal for small to medium sized homes and have an energy output potential of 28kWh per day.

What types of solar systems are available in Newcastle?

In Newcastle, roof-mounted solar systems are the most popular type of residential solar installations. They are practical and enable solar panels to receive as much sunlight as possible throughout the day to produce solar power for your home.

Which solar panels are best for Newcastle?

For Newcastle residents with limited roof space, Mono panels are the best option as they produce more power for the same size panel compared to Poly panels. For those with ample roof space, Poly panels are a cost-effective way to access solar energy.

Do you need a solar battery in Newcastle, NSW?

When you call Newcastle Solar Power for solar installations, our team would usually recommend options for batteries in Newcastle, NSW. A solar battery allows you to store excess energy absorbed by your solar panels so that you can use it after sunset, on cloudy days, and even during power outages.
