

Who is Cairns solar energy solutions?

At Cairns Solar Energy Solutions, we combine local expertise with a passion for renewable energy. Founded by Luke Burns, our company has been delivering quality solar systems for over two decades. Our team is committed to safety, efficiency, and helping Cairns residents lower energy costs while reducing their environmental footprint.

Why should you install solar panels in Cairns?

With over 20 years of experience in Far North Queensland, we specialise in solar systems built to thrive in Cairns' unique climate. The region's subtropical climate and consistent sunlight exposure make it ideal to install solar panels. This offers significant energy production potential and cost savings for homeowners.

How many solar power systems are there in Cairns?

More than 7,500 small scale and home solar power systems had been installed in the Cairns postcode region by the middle of 2020. Owners of these systems are taking advantage of Cairns' great solar energy resources - approximately 5.47 kilowatt-hours per square metre per day on average over a year.

Is Cairns a good location for solar energy?

Cairns is a fantastic location for solar energy, with its year-round sunshine making it ideal for solar power systems. For Cairns homeowners, switching to solar is not only sustainable but a smart financial decision.

Why should you switch to solar energy in Cairns?

Switching to solar is easier than you think. Cairns Solar Energy Solutions offers flexible payment plans and helps customers access Queensland's solar rebates. We make solar power affordable, reducing upfront costs so you can start saving immediately. Cairns' tropical climate is perfect for solar energy, but it requires the right system.

Does Cairns need a solar system?

Cairns' tropical climate is perfect for solar energy, but it requires the right system. Our solutions are engineered to handle high temperatures and cyclones, ensuring reliability and efficiency. Regular maintenance keeps your system running at peak performance year after year.
