Do you need a solar battery in Newcastle, NSW?

When you call Newcastle Solar Power for solar installations, our team would usually recommend options for batteries in Newcastle, NSW. A solar battery allows you to store excess energy absorbed by your solar panels so that you can use it after sunset, on cloudy days, and even during power outages.

What types of solar systems are available in Newcastle?

In Newcastle, roof-mounted solar systems are the most popular type of residential solar installations. They are practical and enable solar panels to receive as much sunlight as possible throughout the day to produce solar power for your home.

Are solar panels effective in the UK?

Solar PV systems are very effective in the UK. The government's new 0% VAT policy starting from April 2022 for the next five years makes it an ideal time for UK homeowners to install solar panels, reaping the benefits of the solar electric system and significantly lowering energy bills. How is the solar electricity used?
