

Should you install solar panels in Wollongong?

Wollongong households and business can benefit from PV installations where the solar panels have a total capacity greater than that of their inverter. Although this will result in some loss of solar panel output on clear days when the sun is high in the sky, more output will be generated when the sun is low or skies are overcast.

Who are the best solar energy panel installers in Sydney?

Solar System Pty Ltd is one of the Best Solar Energy Panel Installers in Sydney. Enquire & Get a Free Assessment!

How many kilowatts of solar can you install in Wollongong?

While in some areas network operators request you contact them first, that doesn't appear to be the situation in Wollongong. Wollongong households can install up to 4.99 kilowatts of rooftop solar if they have single phase power. The maximum is determined by both the size of the inverter and the total capacity of the solar panels.

Who is Solar System Pty Ltd?

Solar System Pty Ltd is well on its way into becoming one of the leading solar power companies in the region. Solar energy technology in practice can be somewhat confusing. However, we work in such a way that we make it easy for our customers. Therefore, we are among the leading solar energy companies in the area.
