

What comes with a solar panel kit for a van?

Solar kits bundle the main components you need to install solar power in your van, including panels, a charge controller, solar fuses, and wiring. You'll still need a battery bank, an inverter, and other accessories like switches, bus bars, outlets, and more fuses.

What is a campervan solar panel kit?

Our camper solar kit involved two things: a solar panel and a Goal Zero. This was the easiest and quickest way to complete our solar panel connection but it's not necessarily the cheapest. If you don't want to fiddle around with solar panel too much with solar panel wiring and inverters then this is the campervan solar panel kit for you.

Which vans can use solar panels?

Our van solar kits and van solar panel products are ideal for those vehicles which are popular for conversion, including: VW Transporter (T4, T5 and T6 models), Mercedes Sprinter, Nissan NV200, Ford Transit and more. All of our van solar kits include the fixtures and components needed for DIY install.

What are the best solar panels for van conversion?

There are a lot of choices when it comes to solar panels for vans but we think the best solar panels for van conversion are the lighter, flexible ones. We combined our Goal Zero with a 300W flexible solar panel (a little like this one).

Do you need solar panels for a van conversion?

One way to plan ahead for power needs is to install van solar panels as part of the conversion. Our van solar kits and van solar panel products are ideal for those vehicles which are popular for conversion, including: VW Transporter (T4, T5 and T6 models), Mercedes Sprinter, Nissan NV200, Ford Transit and more.

Can you add solar panels to a camper van?

It's an easy way to add a camper van solar system to your RV or van without getting too bogged down in electronics which, let's face it, can be complicated. With just a Goal Zero and a solar panel and minimal wiring, you can make an easy camper solar panel kit to keep you powered when you're on the road.
