

Does Arkansas have a net metering policy?

Act 278 passed by the 94th General Assembly in 2023 has overhauled the net metering policy in Arkansas. To take advantage of the current net metering with the "grandfathering" term, Arkansans have until Sept. 30, 2024 to install solar panels to take advantage of net metering at the current 1:1 rate structure.

Should you switch to solar energy in Arkansas?

In Arkansas, the only real bonus of switching to solar energy is the 30% federal tax credit you get during the first year after installation. However, electricity rates are relatively low, and the state offers no strong incentives for converting to solar energy.

Does Arkansas offer a solar tax credit?

Arkansas residents do not have a state solar tax credit. However, they can take advantage of the 26% federal tax credit. Arkansas does have a state-wide net metering policy that mandates that for every surplus kilowatt hour generated by solar, a utility will provide credits equal to the retail rate of electricity.

What is Arkansas Solar Power?

Arkansas Solar Power Inc is a locally owned and operated solar installation company named 'Arkansas Solar Power'. Their goal is to bring 'Natural energy to the Natural State(TM)' by accelerating the adoption of solar technology across Arkansas. This is done to improve grid flexibility, increase environmental conservation, and reduce the carbon footprint of the state.

What is the capacity limit for commercial solar metering in Arkansas?

The capacity limit of Arkansas net-metering for commercial customers is 300 kW of generating capacity. The law allows third-party financing for those looking to use but not own solar energy (such as city government, schools, etc.) and increased the allowed generating capacity for commercial solar systems from 1000 kilowatts to 1 megawatt.

Are solar panels tax deductible in Arkansas?

Arkansas Solar Power Inc is a licensed residential and commercial solar contractor. Most residential and commercial installations qualify for a 30% Investment Tax Credit (ITC). This tax credit is transferable if not fully used the first year. Solar system installations can also be depreciated 100% in the first year.
