

What is the difference between buying and leasing solar panels?

There are three major differences between buying and leasing solar panels: If you purchase a solar system, either with cash or a loan, you own the system and receive 100% of the benefits that come with it. That includes the 30% federal solar tax credit and any other state, local, or installer incentives.

What is the difference between a solar lease and a power purchase?

The difference is in the monthly payment. If you can't afford to buy solar panels, a solar lease or power purchase agreement might help. Buying a solar energy system is considerably cheaper today than it used to be, but it's definitely still a huge purchase. Thankfully, there are ways to get solar power without the huge up-front cost.

How much does it cost to lease or buy solar panels?

Here's a breakdown of the costs associated with leasing and buying solar panels. Leasing solar panels typically involves monthly payments ranging from \$50.00 to \$250.00. Over a standard 25-year lease term, this could amount to between \$12,000 and \$75,000 in total payments throughout the lease.

Can you lease solar panels?

Leasing solar panels involves entering into a contract with a leasing company that owns and maintains the panels installed on your home. This option is particularly accessible due to its financial flexibility:

Should you buy or lease a solar system?

While leasing offers an accessible entry point into solar energy with lower up-front costs, buying provides greater long-term financial benefits and control over the system. Ultimately, making the best choice relies on your unique circumstances, including your financial situation, long-term plans, and energy goals.

Why should you lease a solar system?

**Low Initial Cost:** One of the most significant benefits of leasing is the minimal to no upfront investment required, making it easier for more people to start using solar energy. **Flexibility:** At the end of the lease term, you often have the option to upgrade to newer technology or negotiate the purchase of the system.

**Con: Reduced savings potential.** A big disadvantage of leasing solar panels is the decreased long-term savings opportunity. Since you pay the solar company every month for the length of your lease, you can save money ...
