

What is the difference between a solar lease and a power purchase?

The difference is in the monthly payment. If you can't afford to buy solar panels, a solar lease or power purchase agreement might help. Buying a solar energy system is considerably cheaper today than it used to be, but it's definitely still a huge purchase. Thankfully, there are ways to get solar power without the huge up-front cost.

Should you lease or buy solar panels?

According to Garrett Mendelsohn, CEO of Solar Bootcamp, one big advantage of both leases and power purchase agreements is that many will replace equipment during the contract period when it comes to the end of its lifetime. Can solar panels save you money? Interested in understanding the impact solar can have on your home?

What is the difference between buying and leasing solar panels?

There are three major differences between buying and leasing solar panels: If you purchase a solar system, either with cash or a loan, you own the system and receive 100% of the benefits that come with it. That includes the 30% federal solar tax credit and any other state, local, or installer incentives.

What are the different types of solar lease agreements?

There are two basic types of solar lease agreements: Fixed monthly leases and Power Purchase Agreements (PPAs). Fixed monthly solar leases are pretty straightforward. The solar company installs a system on your roof, and instead of paying your utility bill, you make a lower monthly lease payment on the solar system.

What is a solar lease?

Much like leasing a car, a solar lease is a way to tap into some of the benefits of installing solar but without the commitment of a system that's usually intended to last for a couple decades. Your solar company will install your system and keep it working as it should for the agreement period, so long as you make your agreed upon payments.

Is a solar lease better than a PPA?

“It's especially great for things like batteries that are only warranted for 10 years. It's better than financing a system,” he said. Though solar leases and PPAs can seem like the same thing, there's a big difference in the monthly amount you'll actually be paying. More on that below. What is a solar lease?
