

How do solar lights work?

Powered by solar panels, they absorb daylight and convert it to electrical energy, charging your lights so they're ready to go at night. Unlike mains-powered lights, solar lights are cheap and easy to install, and because these eco-friendly lights are powered by the sun, they'll save you money on electricity bills and batteries.

How do solar-powered outdoor lights work?

Solar-powered outdoor lights are powered by solar cells that convert sunlight into electricity. This electricity is then stored in an internal battery, allowing you to use them just about anywhere there is sunlight exposure--no outlet required.

What powers the LED bulb in solar lights?

The battery later uses that energy to power an LED (light-emitting diode) bulb. Solar lights use photovoltaic (PV) cells, which absorb the sun's energy and create an electrical charge that moves through the panel. Wires from the solar cell connect to the battery, which converts and stores the power as chemical energy until it's needed.

What is a solar lighting system?

A solar lighting system is one of the simplest systems out there. Designed to use the sun's energy and convert it into electricity, it comes with no wires or power bases, making it perfect for outdoor use and remote locations.

Where can you use solar-powered outdoor lights?

You can use them just about anywhere there is sunlight exposure--no outlet required. They're powered by solar cells that convert sunlight into electricity, which is then stored in an internal battery.

What are the benefits of using solar-powered outdoor lights?

Using solar-powered outdoor lights can set that glowing backyard ambiance in a more sustainable way, and eliminates the need for long, ugly cords or constant battery replacement. They're powered by solar cells that convert sunlight into electricity, which is then stored in an internal battery.

Brightness: LED Bulb - 90 Lumens, Side Light - 150 Lumens; Solar energy can be used almost forever and anywhere that gets sunlight. People living where it's hard to get reliable power or who like camping would benefit greatly ...
