

Who is Long Island solar solutions?

Long Island Solar Solutions proudly uses the latest solar and energy-saving products from: Our goal is to design and plan a complete solar electric system that is just right for your home or business. We provide free on-site estimates as well as management of all county/town permits along with electrical permits and inspections.

How does a Long Island Solar System work?

You use the power your Long Island Solar Solutions System generates and draw power from the power grid when needed(for example,at night). During the day it's common that you'll generate more power than you need. This excess power is sold back to your utility company via the power grid at the same price you pay.

Are solar panels worth it on Long Island?

Yes,solar panels are worth it on Long Island. Based on strong incentives,high utility electricity prices,and a favorable net metering policy,homeowners can expect to save tens of thousands of dollars over the warrantied life of a solar system.

Why is Long Island a good place for home solar?

As such,the incentive varies,but the PSEG rewards program can be a great way to reduce the cost of a solar and battery system. The second reason why Long Island is a great place for home solar is because electricity prices are very high,which translates to more solar savings.

Can you go solar on Long Island?

The first incentive that would apply to going solar on Long Island is the NY-Sun Megawatt Block program. This program reduces the upfront cost of going solar based on the size and location of the system. There are three regions: Con Edison,Upstate,and Long Island.

Does long Island still have solar incentives?

There are three regions: Con Edison,Upstate,and Long Island. Unfortunately,the Long Island region maxed out in 2016 and no longer has incentives. However,while the NY-Sun solar incentive has expired in Long Island,there are still funds remaining for battery storage,which we'll discuss later in this article.
